The different citation styles used by the contributors of this publication have been maintained. Readers may also note variations in the capitalization of the word “State” (e.g., “State practice” versus “state practice”) throughout this volume. The editor has elected to respect the individual authors' stylistic preferences regarding this term, reflecting diverse academic and regional conventions. However, consistency has been maintained within each individual contribution.

The editor cannot guarantee the accuracy of the information and statistics contained in the articles.
